**Poisonous Plants Pose a Dangerous Threat to your Pet**

**Pets and Humans eat differently**

If you have taken responsibility for a pet, it is important to learn as much as you can to take proper care of your pet. Food, water, shelter, and an area to rest are basic needs. Read excellent care books, read online or even ask a veterinarian what is the best care you can give and how. Sometimes previous owners can offer the best advice.

*Oleander*

*Crotalaria*

**SERIOUS**

**Safety includes Poisonous Plants**

Keeping your pet safe is so important. Animals can be injured or even die if they are not kept safe. It is your responsibility as a caring owner.

*Nightshade*

*Cherry Tree*

*Croton*

**TOXIC TO ANIMALS**

As a University Animal Science Agent I get many calls each year to help save pets from toxic plants. Puppies and sometimes indoor house cats are at risk. They do not know which plants to eat or not eat.

**What can YOU do?**

You can learn which plants can poison your pets. If a problem starts you can relocate, sell, or even give away a problem plant. Look on websites designed to help you identify and prevent this danger. Don't be sorry later—it's not worth the risk!

*Poison Ivy*

*Poison Oak*

**DANGEROUS TO TOUCH**

**Even plant products can be fatal if consumed like: chocolate, caffeine, and cedar chips. Grapes, garlic, and onions are also toxic for pets.**

*Chocolate*

*Grapes*

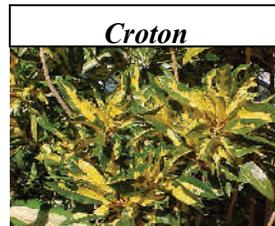

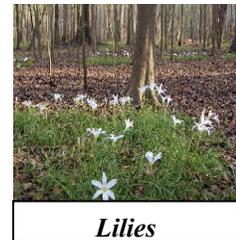

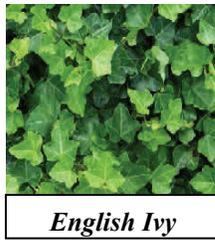

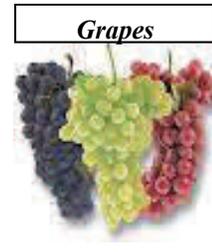

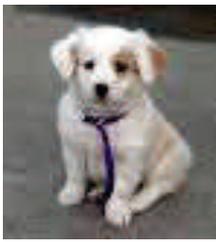

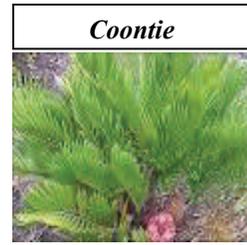

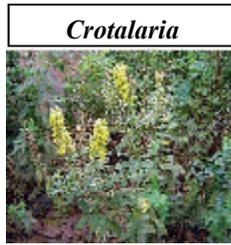

*Cedar Chips*

**VERY TOXIC**

**MAKE YOUR PET SAFE TODAY!**
